Hemisferio derecho e izquierdo del cerebro. Parte I.

Albert Einstein enunció su fórmula $E = mc^2$. Según Einstein, el principio de la existencia es energía y la materia es energía condensada. El átomo contiene 3% de materia y 97% de un espacio vacío que los científicos le llaman "vacío" y que los orientales le llaman "Akash" o "éter". Según la ecuación de Einstein, la materia es energía condensada y el principio de la existencia con base en la energía, representada en el espacio vacío del átomo, es espiritual.

El materialismo dialéctico acepta como materia únicamente lo percibido por los sentidos físicos. Los fenómenos: electricidad y magnetismo nunca los aceptó, hasta que la ciencia los descubrió, pero ya existían.

Con base en esos principios de materia y energía, existen dos tipos de conocimientos y dos fuentes del mismo. Filosóficamente se habla del conocimiento deductivo y del conocimiento inductivo.

Conocimiento Deductivo: de afuera hacia adentro.

Conocimiento Inductivo: de adentro hacia afuera, se le llama intuitivo.

En psicología gnóstica se afirma que cada ser humano posee dos tipos de imaginación: imaginación negativa e imaginación positiva

La imaginación negativa está íntimamente relacionada con el pensar, con la fantasía que produce en nosotros el sueño de la conciencia a través del pensamiento.

La imaginación consciente es la expresión de la conciencia, es la verdadera y real expresión de las cosas.

La fantasía está relacionada con la razón.

La imaginación consciente **está relacionada con la intuición**.

El ser humano posee en su cerebro dos hemisferios: el derecho y el izquierdo.

HEMISFERIO IZQUIERDO.

El hemisferio izquierdo está relacionado con el conocimiento deductivo o razonativo. Es el mismo subconsciente.

El subconsciente es el nivel mas bajo de la mente y actúa como una computadora son base en lo aprendido en la vida: el ejemplo de nuestros padres, las costumbres de la sociedad, lo que nos enseñan en los colegios y universidades, lo que nos enseñan las religiones.

Con base en todo este conocimiento aprendido se programa el subconsciente y con base en estas programaciones se determina el curso de la existencia humana.

El ser humano percibe las impresiones del mundo exterior a través de los sentidos físicos y con base en el conocimiento que posee de ellos, almacenado en la computadora de su subconsciente, procesa sus conceptos que son por todo esto, subjetivos y muy limitados.

El razonamiento nos lleva de la tesis a la antítesis, pero jamás a la síntesis y procesa en nosotros el doloroso batallar de los opuestos, que es la causa del dolor, la inconsciencia y la ignorancia humana.

La intuición como expresión del hemisferio derecho nos lleva de la mano a la síntesis y a la sabiduría de lo divino a través de lo humano.

El subconsciente se procesa con base en tres factores: genotipo, fenotipo y paratipo (herencia, educación y circunstancias).

Del equilibrio o desequilibrio de estos tres factores deviene la conducta social del individuo. Cuando existen desequilibrios de estos tres factores, entonces el resultado es el delito.

Estos factores pueden ser positivos o negativos.

Son positivos cuando se traducen en recto pensar, recto sentir y recto obrar.

Son negativos cuando se traducen en pensamientos y hechos criminales.

El Genotipo se fundamenta en los genes, o sea, la herencia genética está relacionada con la Ley del Karma y los genes están constituidos por cromosomas.

En los genes está la herencia paterna y materna. Por ley del Karma tendremos los padres que merecemos. En la herencia llevamos el resultado de nuestras malas acciones cometidas en vidas

anteriores y así, los valores negativos de un criminal podrán reencarnar en una familia de criminales, los de un borracho en una familia alcohólica, los valores místicos en una familia piadosa, etc.

En el subconsciente, expresión de nuestros defectos, llevamos toda esa herencia síquica que determina una herencia biológica.

Analicemos ahora la educación. Este segundo factor del subconsciente es de suma importancia. La educación comienza en el hogar. El niño aprende más con el ejemplo que con el precepto. El niño presencia en los hogares modernos: el adulterio de sus padres; el niño es testigo presencial de la ira, de la codicia y de la lujuria de aquellos que le dieron la vida; el niño ve con asombro el revólver o la escopeta de su padre y la revista o los cuentos de asesinos y ladrones; el niño va al cine donde goza con balazos, detectives y bandidos salteadores de caminos y de bancos. Cuando llega la noche de Navidad o las Fiestas de los Reyes Magos, el niño recibe de regalo: cañones, revólveres y pistolas de juguete, para que juegue a "bandidos o salteadores de caminos".

Todo esto **va quedando grabado en el subconsciente del niño**. Sus mismos padres lo van envenenando poco a poco, con el veneno fatal de la delincuencia. Pasa el tiempo, el niño crece y las ideas del crimen depositadas en el subconsciente, se desarrollan, evolucionan y progresan, aunque la parte vital consciente ignore todo lo que pasa en las profundas regiones del subconsciente.

Un día cualquiera el fruto está maduro y la cosecha es el delito. Todo lo que se siembra en el subconsciente aflora en la mente a través del tiempo.

La reacción ante la situación, de un homicida que jamás quiso matar, es el resultado fatal de todo aquello que aprendió cuando era niño. El nuevo gangster, el salteador, el ladrón nuevo que antes era un honrado ciudadano, son el resultado de una falsa educación. Las novelas pornográficas y las películas eróticas engendran prostitución, seducción y raptos con fuerza y violencia. Los artistas de cine y los escritores pornográficos están envenenando el subconsciente de los niños y adultos. Ha llegado la hora de luchar contra la corrupción moral y las prostitutas de la inteligencia.

En la escuela el niño aprende historias sangrientas, que se graban en el subconsciente, de astucia, de malicia, de desconfianza, etc. Todo esto se graba en el subconsciente y el resultado fatal es el delito. El niño presencia el adulterio, la violencia y la codicia de sus padres. La televisión con violencia, pornografía, todo esto programa el segundo aspecto del plano del subconsciente. Si esto es así, podemos afirmar que la sociedad y los padres van envenenando el subconsciente del niño. Así, la pornografía genera posteriormente prostitución, seducción, raptos, sadismo, etc. Es por esto que a los pornográficos se les llama "prostitutas de la inteligencia".

Como vemos, el subconsciente a través del hemisferio izquierdo procesa en nosotros la mecánica, la inconsciencia, el dolor y las enfermedades, por muchas vidas. El hemisferio izquierdo es el que mas utilizamos los occidentales.

Vamos a estudiar las circunstancias: ciertas circunstancias críticas irritan al subconsciente provocando

reacciones criminales. Circunstancias objetivas se combinan en el subconsciente con circunstancias semejantes para provocar el delito. Por ejemplo: un hombre sin trabajo lleno de hambre y miseria, recuerda haber visto en su infancia a su padre en la misma crisis. Viene a su memoria cuando el padre asaltó a una persona en la calle para robarle. Se acuerda de la buena comida que se sirvió en su casa después del atraco, etc. Entonces la circunstancia crítica en que se halla el hombre sin trabajo y la circunstancia subjetiva del recuerdo, se combinan para provocar el crimen.

Los tres factores: genotipo, fenotipo y paratipo son la psicogénesis de todo acto criminoso. Solo con una cultura integral que nos lleve al autoconocimiento, se logrará extirpar el delito desde sus mas íntimas raíces. **El subconsciente se procesa en el ser humano con base en los tres factores: Genotipo, fenotipo y paratipo.**

llegaron los siguientes informes:

Hola, Mi nombre es Arturo y he estado siguiendo las lecturas con fervor. Empezaré relatando una de mis experiencias en

astral.

Estaba soñando que iba caminando a lo largo de la orilla del Río Sacramento cerca de mi casa, estaba recogiendo leña para quemar al principio de la tarde para preparar una fogata con mi primo. Estábamos discutiendo cosas y de pronto yo le dije "Recuerdo que solíamos venir aquí todo el tiempo cuando tu todavía estabas vivo". En ese momento me di cuenta que estaba en un sueño, usando la técnica para preguntarme si yo estaba dormido o despierto e investigando con el salto. Para mi sorpresa quedé flotando y mi primo me interrumpió preguntándome qué quería yo decir con que "él estaba muerto", sin reconocer que había muerto hacía algunos meses. Tratar de explicarle fue en vano y no tuve otra opción que abandonar esta ilusión.

Me la pasé el resto de la experiencia volando sobre el río y viendo hacia abajo a mi pueblo.

De acuerdo a como la auto-observación es planteada, la he usado para darme cuenta de muchas cosas más y de mis amigos. Uno de mis amigos constantemente me presiona para que tome trago cuando no lo deseo hacer y es a través de la eliminación de los egos que este deseo de complacer a mi amigo, el deseo de encajar, de verme atractivo y moderno y el deseo de tomar trago, los he manejado y así he resistido la tentación.

Algunos días alcanzo aproximadamente 200 eliminaciones o más, mientras que otros días llego apenas a las 50. Pero me he dado cuenta que entre más pendiente estoy de mí mismo, el promedio aumenta.

Me es grato dirigirme a usted a fin de comentarles el resultado del estudio del alma. Estoy gratamente satisfecho de las enseñanzas que puedo obtener en cada una de las lecturas. Actualmente estoy saliendo de una situación particular muy desagradable, la cual me ha afectado de manera personal y familiar. Esta desagradable situación me ha llevado a pensar hasta en el suicidio. Sin embargo gracias a la oportuna lectura, así como también de la ayuda familiar y Divina, estoy saliendo de esto. Quisiera comentar, para terminar mi relato, que gracias a la clase N° 8 me pude dar cuenta de que cada uno de nosotros los seres humanos, tenemos momentos que nos llevan a pensar cualquier locura, pero gracias a Dios tenemos medios que nos hacen reflexionar, tal como este Web Site que fue muy oportuno y justo cuando uno más lo necesita. Quiero dar mis más expresivas gracias a los promotores de este conocimiento y que se siga difundiendo para ayudar a todas aquellas personas que en algún momento puedan necesitarlo. Sinceramente, Benigno. Venezuela

Do you think the best way to get the cheapest plane tickets is by calling the airline? Or, do you scan through hundreds of websites provided by search engines to find low airfare tickets? Maybe you hope to find cheap airfare in the local newspaper's travel section.

Finding cheap airline tickets can be one of the most frustrating experiences that most of us learn very quickly. Of course, most people eventually give up after spending hours scanning websites that offer virtually the same flight schedules and pricing. People purchase what they believe is the cheapest plane ticket, only to find their neighbor paid just a third of what they did!

Unless you understand the concept of how airlines set prices, all the searching in the world won't provide the cheapest airline ticket prices. The following information will give you a guide to follow, as you wander through the maze searching for cheap airfare.

Understand how prices are set by airlines! Air ticket pricing is complex and unpredictable, and driven by competition, demand, and inventory. Airlines call this "yield management."

Competition is the beast behind the cheapest plane tickets. All major airlines utilize central reservation systems (owned by various airlines) to fill available seats. The systems are known as Apollo, Sabre, WorldSpan and Galileo. Prices are based on demand, and if some flights are selling well, the price will increase. If the flight is unpopular and has very little demand, the fare is lowered in hope of attracting consumers. In short, fares and inventory change every minute of every day!

Finding the cheapest plane tickets is difficult because travel agents and Internet websites use the central reservation systems that are updated periodically throughout the day. The reason why different searches come up with different results is because the systems are not updated at the same times. And, each system may use different algorithms when searching for low airfare tickets, which can provide a variety of ticket prices .

Long time lurker, thought I would say hello! I really dont post much but thanks for the good times I have here. Love this place..

When I was hurt in that motorcycle accident my life would be changed eternally. Sadly that driver had no car insurance and I was going to be hurting for ever.

This was not time for me to start and guess what to do. I had to find a good accident lawyer to help me get what I needed. After all, my family was counting on me.

How rotten was it? I has bedridden for 4 months, I had to have constant care and my medical bills went through the roof!

Thank goodness, I found a good referral site to help me.

I will post more later this year to tell you more about what I have been going through.
